Our **proprietary white nonwoven hygienic liner face sheet** absorbs moisture protecting both the garment and the person wearing it. It is incredible how it works - **liquid is quickly absorbed and does not transfer once dry**. For this reason, we always recommend customers use our hygienic liners with the white nonwoven face sheet.

Fastest Picking Rate

Low Inventory Carrying Cost

Reduce Chargebacks

Best-Cost Options

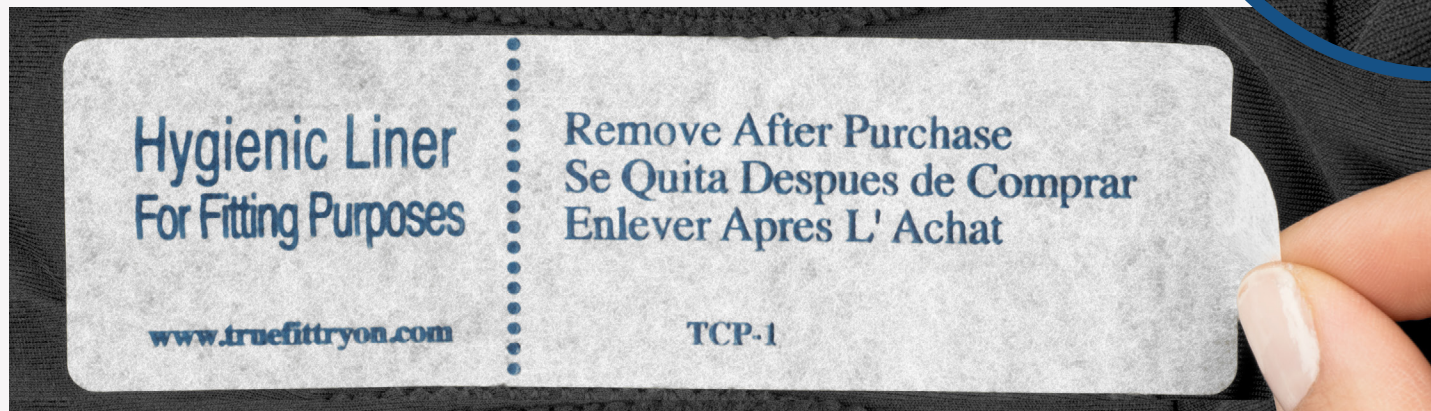

## FASTEST PICKING RATE

The TCP-1 Hygienic Liner is designed **without any adhesive under the tab**. This increases the picking rate and reduces the time needed to both install and remove it from swimwear.

Time is money... It is widely known that increasing the "picking rate" or reducing the time that it takes to both remove the existing Hygienic Liner and placing a new Hygienic Liner in a returned women's swimsuit, results in saved money in the form of reduced labor costs. The TCP-1 style Hygienic Liner increases the picking rate due to the fact that there is a void of medical grade adhesive under the 3/8" tab.

Rigorously tested and consistently deployed by the world's most successful swimwear manufactures, retailers and websites, the efficiency of our TCP-1 Hygienic Liner cannot not be matched anywhere by anyone else.

- Minimize expensive labor costs
- Maximize process efficiency

LOW CARRYING COST

## Save Space. Easy Storage. Easy Distribution.

True Fit Try On Hygienic Liners come in convenient rolls of 1,000. Each roll is shrink-wrapped to ensure protection from humidity while also keeping clean and hygienic. Each compact, easy-to-stack case contains 10 rolls, or 10,000 total pieces. Stored correctly, True Fit Try On Hygienic Liners remain in optimal condition for two full years.

TCP-1 ROLL SHOWN ABOVE. DIMENSIONS FOR EACH CASE OF TEN ROLLS IS: 16" X 8" X 9" – CASE WEIGHT IS 18 POUNDS.

## Reduce Chargebacks. Reduce Waste.

With state-of-the-art adhesives, TFTO Hygienic Liners stay securely in place. They won't fall out causing chargebacks and they will not damage the garment causing costly waste.

## Low Inventory Carrying Cost. High Quality Products.

With three proprietary types of world-class adhesives, eight styles of Hygienic Liners and over three decades of experience, True Fit Try On® offers the perfect Hygienic Liner for your needs.

# Highest Quality.

We are the only company in the world that manufactures proprietary pressure sensitive base material for Hygienic Liners. We have revolutionized our medical-grade adhesive, coating weight, release liner and nonwoven face sheet of our Hygienic Liners. This is one of the reasons why we are able to consistently produce the world's highest performing Hygienic Liners.

Today, we produce eight unique styles of Hygienic Liners perfect for every imaginable application. An industry-leading product line, which features our three proven adhesives developed by True Fit Try On<sup>®</sup> together with the world's finest experts.

PROVEN RELIABILITY

For **30 years** True Fit Try On<sup>®</sup> has lead  
the industry in service and quality.

We have shipped over **1.4 billion** units worldwide  
with **zero** missed confirmed ship dates.

## Our Clients. Our Commitment.

For over 30 years we have provided world-class Hygienic Liners for manufacturers of the world's top swimwear brands. We look forward to developing a long and healthy business relationship with you.
